

Mind Mapping

Mind Mapping is a powerful tool to help our brains connect a central idea to supporting ideas. Follow these steps to complete:

1. Start in the center of a blank page turned sideways. Why? Because starting in the center allows your brain freedom to spread out in all directions.
2. Connect your main branches to the central idea and connect your second and third level branches to the first level. Why? Because your brain works by association helping you to understand and remember easily.
3. Use one (1) key word per line. Why? Because single key words give your Mind Map more power and flexibility.
